

2014-2015 5th Generation Camaro Stealth Splash Guard/ Mud Guard Installation Guide (Patent Pending Design)

This Camaro splash guards kit includes:

- (4) splash guards
 - (2) for the front wheels.
 - (2) for the rear wheels.
 - No drilling, glue or tape required.

These 2014-2015 Camaro splash guards use stock hole locations to mount in combination with providing clips.

Best of all - you don't need to remove the wheels on your Camaro!

PLEASE NOTE: The rear splash guards will not work on a vehicle with the factory ground effects.

The (2) front splash guards require the removal and reinstallation of two screws per splash guard along with a provided clip.

The included clips are to tie the front guards to the inside of the front fender at the top.

The (2) rear splash guards include new screws and spacers for a very simple installation.

These splash guards are made for the 2014 and 2015 Camaro. They are not a universal splash guard kit. These were designed to follow the body lines of the Camaro and to remain almost unseen.

All hardware is included along with the proper screwdriver for a very simple installation. You do not need to remove your wheels to install these Camaro splash guards.
